This declaration of conformity is issued under the sole responsibility of the manufacturer.

Subject of the declaration	PACKAGING: Paper (cardboard, labels, leaflets) + LDPE bags + foil stretch+rebates+tape adhesive + stickers (logistics unit, courier) + pallet
Packaging description	Packaging consists of a multi-material set of elements used in the packaging, protection, transport, and identification of the product. The packaging includes: • paper elements (cardboard, labels, leaflets) with protective, informational and identification functions, • low-density polyethylene (LDPE) bags used as individual packaging to protect the product against external factors, • stretch film used to stabilize the load on the pallet and protect it against mechanical damage and dirt, • document rebates enabling safe placement of transport documents, • adhesive tape used to close and secure bulk packaging, • stickers (logistics and courier) for identification, tracking and logistics of shipments, • pallets (used depending on the size of the order), which perform a load-bearing function and enable transport and storage. The entire packaging system was designed to ensure product protection during transport and storage, optimize logistics processes, and enable efficient material utilization. The materials used are largely recyclable and comply with applicable regulations regarding packaging and packaging waste.

The subject of the declaration complies with the relevant provisions of EU harmonisation legislation :
