

Technical Specifications

Surface:	50% Polyester (recycled) / 50% Polypropylene
Backing:	100% Nitrile Rubber (Recycled content)
Backing Type:	Flexible flat backing
Total Height:	8mm
Total Weight:	2900g/m ² (+/- 3%)

Customs tariff number: 56031490
Recycled Materials

Sizes and Weights

■	45cm x 75cm ≈ 0.98kg
■	55cm x 85cm ≈ 1.36kg
■	60cm x 90cm ≈ 1.57kg

All weights are approximate weights. Please note our size and colour tolerance of +/- 3 %.

Care

To remove coarse and dry dirt, the doormat can simply be shaken or brushed off. Heavy dirt can also be cleaned off the mat with a garden hose and water (please do not use a high-pressure cleaner). After cleaning with water, it is best to lay the mat flat in a warm place to dry. The mat can absorb a lot of water yet is quick drying.

Besides shaking it out, you can also vacuum it regularly using a smooth nozzle. This removes dirt and dust, and keeps the mat clean and functional. This level of care is sufficient for everyday use.

If the mat should become very dirty, it can be machine washed at max. 40°C. Use a mild detergent and spin the mat at a low speed. Once washed, lay the mat out flat to dry. Please consider the maximum load capacity of your appliances. Machine wash the mat once a year to maintain the rubber and to avoid dark abrasions to the surface.

Bleaching, ironing, and dry cleaning are not recommended.

Properties

- 2-year guarantee
- Made in Europe
- Suitable for outdoor and indoor use
- Traps moisture and dirt perfectly
- Rain drains off well through the deep grooves
- Manufactured with a proportion of recycled materials
- Modern design and interesting 3-D surface structure
- Mottled surface hides trapped dirt well
- Lightfast colours
- Non-slip and PVC-free
- Suitable for underfloor heating
- Manufactured according to ISO 14001:2015

In the case of PVC, linoleum, laminate and wooden floors, discolouration may occur due to a reaction with rubber-coated mats.
